

Clearing to Begin at I-66 and I-267

June 26, 2008

Dear Resident:

The Dulles Corridor Metrorail Project will be doing additional work along the I-66/Route 267 corridor where the two highways meet starting June 30 and ending July 3, weather permitting.

Crews will be working near the West Falls Church Metro Station on the grassy/tree islands between lanes, clearing trees and brush in preparation for the future construction of the Dulles Metrorail line. The work complies with Virginia's Department of Conservation and Recreation regulations. Construction crews will remove only trees and growth needed for construction and staging areas.

If you have questions about this work, call the Dulles Corridor Metrorail Project Hotline at 877-585-6789; or call Marcia McAllister at 703-572-0506.

For general information about the Project, visit our website at www.dullesmetro.com.
