Dulles Corridor Metrorail Project
PHASE 2
17

Tree Relocation Work at Washington Dulles International Airport *Lane Closures in Effect on Saarinen Circle*

On or about June 16, Dulles Corridor Metrorail Project crews will recommence transplanting the Eastern Red Cedar trees and Nellie Stevens Holly trees from the front of Daily Garage 1 to other locations at Washington Dulles International Airport. This work is expected to take two weeks to complete.

Drivers may encounter lane and shoulder closures between 8 a.m. and 2 p.m. as well as slow-moving vehicles while the trees are being moved. Traffic signs and barricades will be in place along Saarinen Circle. Large vehicles may be exiting and entering airport roads at various times at the tree relocation sites.

The trees must be moved to make room for the construction of the Silver Line's Dulles Airport Station, which will be built in front of the existing Daily Garage 1.

Those interested in receiving up-to-date information on the progress of the Dulles Corridor Metrorail Project - Phase 2 can sign up at www.dullesmetro.com.
